

Formal Meeting 14 on 11th of March 2019, 11:10 - 12:10

Participants: Paul Dempster, Sheung Hung Poon, Denis Stepanov, Melanie Cheong, Mingda Liu, Tianhao Li, Yiming Chen, Masrur Sobirov

1. Role of supervisor
 - Should be guiding the team and not fixing problems.
 - Check if project and development going well.
2. Current progress
 - Challenges: connecting the database and merging all of the parts of application.
3. Evaluation of software
 - Can be evaluated by focus groups or survey but takes too much time.
 - Or without involving people which is quicker but not as authentic.
4. Final report
 - The interim report can be reused but it needs to be rewritten and should not be base of the final report.
5. Classification of routes
 - Like and dislikes buttons can be implemented for users to rate the routes.
6. Database
 - Client app should ask server for data and only server should have access to database which makes it more secure.
 - Don't try to make everything very efficient. Focus more on quality and flexibility of connection with database.
7. Registration emails
 - Using emails as username is not preferable.
 - Emails must be classified.
 - Paul advised disabling the registration off-campus.
8. Manager accounts
 - The first person who created the wall could be the manager of it
 - Or create some manager accounts and give to managers.
9. Presentation day
 - Don't need to focus on it until the report and app are submitted.
10. Leaving supervisor Paul still happy to play the role of customer and can help with smaller issues.
